

The timeline of AI is as follows:

- 1923 Karel Capek's play named 'Rossum's Universal Robots' (RUR) opened in London to use the word 'robot' in English for the first time.
- 1943 Foundations for neural networks were laid, which is the base of Artificial Intelligence.
- 1945 Isaac Asimov, alumnus of Columbia University, coined the term Robotics.
- 1950 Alan Turing introduced the Turing Test for evaluation of intelligence and published the paper Computing Machinery and Intelligence.
- 1956 John McCarthy coined the term Artificial Intelligence. He demonstrated the first running AI program at Carnegie Mellon University.
- 1958 John McCarthy invented the LISP programming language for AI.
- 1964 Danny Bobrow's dissertation at MIT showed that computers can understand natural language well enough to solve algebra word problems correctly.
- 1965 Joseph Weizenbaum at MIT built ELIZA, an interactive program that carries on a dialogue in English.
- 1969 Scientists at Stanford Research Institute developed Shakey, a robot, equipped with locomotion, perception and problem-solving.
- 1973 The Assembly Robotics group at Edinburgh University built Freddy, the famous Scottish Robot, capable of using vision to locate and assemble models.
- 1979 The first computer-controlled autonomous vehicle, Stanford Cart, was built.
- 1985 Harold Cohen created and demonstrated the drawing program, Aaron.
- 1997 The Deep Blue chess-playing computer beats the world chess champion, Garry Kasparov.
- 2000 Interactive robot pets become commercially available. MIT displays Kismet, a robot with a face that expresses emotions. The robot, Nomad, explores remote regions of Antarctica and locates meteorites.
- 2011 Apple introduced Siri, a digital assistant, as a part of the iPhone 4S.
- 2014 Amazon released the Amazon Echo.
- 2015 Sophia, a social humanoid robot, was developed by Hong Kong based company Hanson Robotics.
- 2016 Microsoft launched Tay, an AI chatter bot and later withdrew it.
- 2017 Google released the DeepMind NHS app test that broke UK privacy laws.
- 2018 Erica, a robot in Japan, was introduced to the world as a news anchor.
- 2019 A genderless voice was created.
